## PREVENTION PLAN FOR CATS

Now you're well on your way to creating a flea-free home, use this Prevention Plan to reduce the opportunities for fleas to return.

- ♥ Apply Revolution® Plus to your cat to ensure its protected for the full month. We recommend treating on the same day each month to make it easier to remember.
- ♥ It's important to treat your cat all year round, not just in the warmer months when you might see fleas on your cat or in your house environment. This ensures any flea eggs & flea larvae that you can't see are kept away.
- ♥ Wash your pet's bedding in hot water, or replace it regularly.
- ♥ Pay attention to potential re-infestations due to contact with untreated animals.
- ♥ Try to keep untreated animals out of your home living areas.
- ♥ Thoroughly vacuum your house regularly, making sure to move furniture and vacuum under couch cushions. Pay particular attention to the areas where your pets eat, play and sleep.
